

Nanocerox awarded STTP by United States Air Force to commercialize product

NANOCEROX TO PENETRATE THE COMMERCIAL DOD MISSILE DOME MARKET.

ANN ARBOR, MI – OCTOBER, 2011

Nanocerox, located in Ann Arbor, MI, was awarded a \$2.5M STTP (SBIR Technology Transition Plan) to scale up their powder production capabilities in order to supply sufficient quantities of nanocomposite materials for an undisclosed missile system.

“This expansion will allow Nanocerox to penetrate the commercial market,” says Michael Kelly – CEO / President. “We will be able to transfer this scale-up process to our other areas of production, thus allowing us to better meet the needs of new and existing customers.”

ABOUT NANOCEROX

Nanocerox is a leading producer of high purity ceramic nanopowders and optical ceramics; and develops, refines and manufactures nanopowders to produce products requiring transparency, durability and heat resistance for use in industrial, military, medical and aerospace applications. Nanocerox's patented Liquid Flame Spray Pyrolysis process produces highly pure, chemically-precise and uniformly-sized nanoparticles.
