

Nanocerox integrates new Ceramics Lab

NANOCEROX CONTINUES TO INVEST IN CERAMICS R&D AND PROCESSING CAPABILITIES

ANN ARBOR, MI – JANUARY, 2012

Nanocerox recently invested in the construction of a new Ceramics Lab at its Corporate Headquarters, located in Ann Arbor, MI.

“Nanocerox goes to great lengths to ensure the purity of the nanopowders it produces,” says Todd Stefanik – Vice President of Technology. “Construction of our new ceramics laboratory will allow our processing team to fabricate those powders into transparent materials while maintaining high purity critical for laser, window, and scintillator applications.”

“Nanocerox is committed to investing in our Ceramics capabilities moving forward,” says Michael Kelly – CEO. “This new lab will allow Nanocerox to improve our abilities to provide industry-leading Ceramics to our commercial and military customer base.”

ABOUT NANOCEROX

Nanocerox is a leading producer of high purity ceramic nanopowders and optical ceramics; and develops, refines and manufactures nanopowders to produce products requiring transparency, durability and heat resistance for use in industrial, military, medical and aerospace applications. Nanocerox's patented Liquid Flame Spray Pyrolysis process produces highly pure, chemically-precise and uniformly-sized nanoparticles.
